SUMMARY

Third-year B.Tech (Computation & Media) student at Mahindra University who creates AI-generated films, images and videos with a strong storytelling focus. Professional experience as a freelance Generative AI Artist and as an instructor teaching AI image and video generation. Skilled in prompt writing, visual direction, video editing and photography, and comfortable blending AI-generated content with traditional editing and post-production workflows.

EXPERIENCE

Freelance Generative AI Artist, Guru Films (for Sutram)
Jun 2026 – Aug 2026

- Created 9 AI-generated videos and 24 images for Sutram, an app based on the Ramayana, following the app's story and visual direction.
- Produced assets using Kling AI, Veo 3, Nano Banana and OpenAI's GPT Image, maintaining visual consistency across characters and scenes.
- Project details are confidential under an NDA.

Instructor (Internship), Helping Hands for Humanity (NGO)
Jun 2026 – Jul 2026

- Designed and delivered 24 hands-on sessions for 10–15 students in Classes 11 and 12 on AI image and video generation, photography and video editing.
- Trained students on VN, Kling AI, Veo 3, OpenAI's GPT Image and Nano Banana; students produced their own AI-generated images and videos by the end of the program.

PROJECTS

AI Films – Generative AI Short Films

- Created short films using generative AI tools, including *True Happiness* (a fable about humility and helping others) and *Wild Intelligence* (a rabbit using intelligence to escape danger).
- Handled concept, story, prompt writing, visual direction, editing and final presentation.

The Gravesons – AI YouTube Shorts Channel

- Launched a comedy Shorts channel following a family of six, with characters, backgrounds and scripts all generated with AI.
- Automated the workflow from content creation to upload. Channel: youtube.com/@the_gravesons

AI + Live-Action VFX Experiments

- Shot live-action videos and created visual effects in Google Vids, including laser beams from the eyes and flames from the hands.
- Built a finger-snap transition in Google Vids that changes the scene's look from live action to art, clay art and pop art, building a consistent visual style across each change.

Video Editing – Fan Edits

- Edited *The Dark Knight* and an Itachi Uchiha (Naruto) edit, *Love Me*, focusing on mood, pacing, typography and rhythm.

Graphic Design – Posters and Event Collateral

- Designed 7 posters, including event material for the Mahindra University School of Digital Media and Communication: the Human and Digital Mutualism conference (21–22 Nov 2025, with ICA India) and the Innovation Through Play workshop.
- Also created *Bharathanatyam*, *Eyes*, a TIME International–style cover on Hyderabad, and a minimal red silhouette illustration.

Photography

- Built a personal series of 12 frames covering landscapes, architecture, wildlife and city light, shot largely on mobile.

The Ball – Physics Puzzle Game (Unreal Engine)

- Designed and built a solo physics-based puzzle game where the player rolls a ball through obstacles, ramps, gaps and moving pieces to reach the finish line.
- Focused on movement feel, momentum and level pacing. Source: github.com/Karthik080600/The-Ball

SKILLS

AI and Generative: AI image generation, AI video generation, prompt writing, Kling AI, Veo 3, OpenAI GPT Image, Nano Banana, Runway

Storytelling and Creative: Storytelling, visual direction, concept development, video editing (VN, DaVinci Resolve basics), Google Vids, VFX experiments, videography, photography, graphic and poster design

Technical: Unreal Engine, game design, Git and GitHub

EDUCATION

B.Tech (Computation & Media) — Mahindra University, Hyderabad
Third year (ongoing)
